SELECTED GRASS and CLOVER SEEDS

The grass and clover seeds offered by us are all of the best grades, and have been specially re-cleaned to meet the demands of our critical trade. Prices for large quantities will be quoted on application. This is more satisfactory than quoting here, as prices are subject to frequent changes with market fluctuations.

GRASS SEED

Menlo Park Lawn Grass. We devote great care to the preparation of this article, and by careful tests have proved its superiority over all other mixtures. It is composed of the very choicest selected fancy cleaned grasses, entirely free from seeds of weeds, and we can with confidence recommend it to those who wish their lawns to present an evergreen, carpet-like appearance. Price per pound, 30 cents. For the convenience of those who require only a small quantity of seed, MENLO PARK LAWN GRASS is put up in boxes containing sufficient for 300 square feet. We forward these boxes, free by mail, at 25 cents each.

	Per lb.
Kentucky Blue Grass, Fancy Clean (<i>Poa pratensis</i>). This is the best pasture grass for our climate and soil, and produces the most nourishing food for cattle; although it yields herbage early, it requires several years to become well established as a pasture grass.....	\$ 0 25
Orchard Grass (<i>Dactylis glomerata</i>). The most valuable and widely known of all pasture grasses, coming earlier in the spring and remaining longer than any other; it is well adapted for sowing under trees, and valuable either for grazing or for hay.....	20
Red-Top (<i>Agrostis vulgaris</i>). A valuable permanent grass for meadows or lawns, growing in almost any soil, moist or dry, and standing heat well.....	12
Red-Top, Absolutely Clean. Cannot be surpassed in quality.....	20
Rye Grass, Perennial (<i>Lolium perenne</i>). Enters largely into the composition of many of the richest pastures, and is one of the most nutritious of the permanent grasses....	15
Rye Grass, Italian (<i>Lolium Italicum</i>). Similar to the preceding, but of more rapid growth, which is its chief merit.....	12
Timothy (<i>Phleum pratense</i>). Well-known and extensively grown; very productive, and thrives on almost any soil, and on a moist clay will produce a larger crop than any other grass.....	10

CLOVER SEED

Alfalfa or Lucerne (<i>Medicago sativa</i>). Succeeds well in almost any location, and lasts for a number of years; it grows two or three feet high, and the roots extend deeply into the soil, which enables it to resist the severest drought; it produces heavy crops of nutritious foliage, which may be cut three or four times a year, the best time being just when commencing to bloom.....	20
Alsike (<i>Trifolium hybridum</i>). Thrives well on rich, moist soils, and yields an enormous bulk of forage much preferred by cattle; may be cut several times a season, and as an addition to mixtures for permanent pastures has no superior.....	30
Japan Clover (<i>Lespedeza striata</i>). A branching perennial, growing about twelve inches high, and in warm latitudes will do well in any soil, even during extreme drought; more nutritious than Red Clover, and makes excellent hay.....	40
Medium Red (<i>Trifolium pratense</i>). A well-known standard; excellent for pasturage or hay, and should be in all grass mixtures. If sown alone, ten pounds per acre is required.....	20
White Dutch (<i>Trifolium repens</i>). A spreading perennial; valuable for pastures and lawns; it accommodates itself to a variety of soils, but prefers moist ground; is excellent food for bees.....	35

CHOICE NAMED HYACINTHS

FOR CULTURE IN POTS, GLASSES OR THE GARDEN

SINGLE HYACINTH

DOUBLE HYACINTH

CULTURE—For growing in pots.—Plant from September to December, using a light loam mixed with leaf mould and well decomposed manure. Cover the bulbs so that the tops will just show, and after watering well place in a cool, dark place out of doors, where they should remain until the pots are full of roots and the tops have sprouted about an inch, which will be in about six or eight weeks. They may then be removed indoors to a sunny situation and plentifully supplied with water at the roots.

For growing in glasses—Allow the water to just touch the base of the bulbs, and place them in a dark closet or cellar where the temperature is about 50°. Expose gradually to light and sun when the glasses are well filled with roots. Change the water as it becomes impure, drawing the roots entirely from the glass, and rinsing in clean water. Be particular to always keep the water to a level with the base of each bulb.

For growing in the garden—Bulbs may be planted any time from September to December. They require a light rich soil and the crown of the bulb should be three to five inches below the surface; set six inches apart. Where the ground becomes frozen cover with straw or leaves to the depth of about three inches, removing the covering early in spring.

If ordered by mail please add fifteen cents per dozen for postage.

DOUBLE HYACINTHS

	EACH
ANNA MARIA—Waxy pink, violet eye.....	\$0 10
BLANCHARD—Pure white.....	15

EARLY WHITE ROMAN HYACINTHS

This beautiful and very valuable variety, if planted in September and gently forced, will bloom in November, or flowering may be retarded till Christmas by keeping in a cool place. The flowers which are smaller than those of the ordinary Hyacinth are produced in great profusion, each bulb throwing up three or four spikes of delicately scented, clear white blossoms; highly recommended for parlor decoration.

Extra large bulbs, 10 cents each; 75 cents per dozen; \$4.00 per hundred.

TULIPS

A GROUP OF TULIPS

THIS class of bulbs are of easy culture, flowering freely in almost any location producing as fine flowers in the city garden as in more favored places. Double and single tulips, mixed and planted together, maintain a more extended display than if planted separately, their continued beauty and great diversity of shade and color never failing to please. Cultural treatment similar to Hyacinths, except that the bulbs being smaller, must not be planted quite so deep.

If ordered by mail please add five cents per dozen for postage.

DOUBLE TULIPS

	EACH	PER DOZ.
DUC VAN THOL—Bright Red....	\$0 05	\$0 40

One bulb each of above ten distinct Single Tulips for Sixty Cents.

Splendid Mixed Varieties of all colors, per doz., 35c.; per hundred, \$1.50.

PARROT TULIPS

These are of singularly picturesque appearance, and exceedingly showy on account of their curiously lacinated petals and richly varied shades of beautiful colors in the same flower.

Splendid Mixture, from many named sorts, per dozen, 40c., per hundred, \$3.00.

CROCUSES

This is one of our earliest Spring flowers and on account of its varied colored blossoms, is remarkably effective. The more thickly crocuses are planted the finer is the effect produced—say in clumps of six, twelve or more bulbs or in beds of one hundred to five hundred bulbs, either in separate colors or mixed. With ordinary care they will bloom freely in any sitting-room window.

CULTURE.—Plant the bulbs two inches deep and two or three inches apart. When grown in pots plant thickly and treat as in the cultivation of the hyacinth.

☛ If ordered by mail please add 15 cents per hundred for postage

GROUP OF IXIAS.

	PER DOZ.	PER 100

YELLOW— “ “	20	1.00

Extra Fine Mixed Crocus of all colors, selected strong bulbs. Per doz., 15 cts.; per hundred, 75 cts.; per thousand, \$6.00.

IXIAS

The Ixia is a slender graceful-growing plant with long, loose spikes of bloom, resembling a miniature Gladiolus. The colors are

rich, varied and beautiful, the centre always differing in color from the other parts of the flower, so that the blossoms expanding in the sun's rays present a picture of gorgeous beauty. Very desirable for pot culture, but requiring protection where frosts are severe.

All varieties in splendid mixture, per doz., 30 cts.; per hundred, \$2.00.

SPARAXIS

It would be difficult to conceive colors more diversified and magnificent than abound in this family. They will not do out doors in cold climates but are invaluable for greenhouse or parlor culture.

All colors mixed, per dozen, 30 cts.; per hundred, \$2.00.

SNOWDROPS

A well-known beautiful, early, white flower, loved by all. There is no trouble growing this modest little plant; merely set them about two inches deep and one inch apart in clumps or rows.

	PER DOZ.	PER 100
Double.....	\$0.30	\$2.00
Single.....	.25	1.75

TROPÆOLUM TRICOLOR

This is a tuberous-rooted winter-blooming Nasturtium for pot culture, which is one of the most charming window vines one can possess during winter. Pot bulbs in good soil and treat them like other winter bulbs. They are somewhat slow to start, but will after a while throw up little needle-like shoots, which should be supported on strings or trellises. After a short time they will develop beautiful tiny foliage, which will soon be followed by hundreds of brilliant flowers, scarlet, tipped with black and yellow—which keep perfect a long time. 30 cents each.

AMARYLLIS

The bright colors and handsome form of the Amaryllis make it very effective both for greenhouse and parlor decoration, while its cultivation is so simple that it can be grown by any one. The soil most suitable is a good loam, with one-fourth part of leaf-mould and a proportion of sand; water moderately until the plants show indications of flowering. Frequent disturbance of the roots should be avoided.

	EACH		EACH
AULICA PLATYPETELA—Scarlet tipped green.....	\$1.50	JOHNSONII—Crimson, striped with white,	\$1.00
BELLADONNA—Dark rose and white.....	25	LONGIFLORA ALBA—Fine white.....	40

FORMOSISSIMA—Rich crimson.....	20	PURPUREA—(Vallota).....	30

One bulb each of the above eight magnificent sorts will be sent for \$3.50.

FREESIA

FREESIAS

These are much prized on account of their graceful form and delightful fragrance. They are of the easiest possible culture and a pot of five or six bulbs will be sufficient to perfume a large room. As cut flowers they are extremely valuable; the unexpanded blooms opening in water fill the air with the most delicate perfume and last for many days.

	PER DOZ.	PER HUND'D
REFRACTA ALBA—Pure white.....	\$0.25	\$1.50
LEICHTLINI MAJOR—Creamy white.....	40	2.00

Freesias are easily raised from seed and will flower in six months from time of sowing. Per packet of 100 seeds, 10 cents.

CYCLAMEN

These are indispensable for indoor decoration and are the most charming of winter and spring flowering bulbs. Those we offer are the Giant-flowered varieties and for clear and beautiful colors, massive substance and fine form of flowers are unrivaled. The pretty variegated foliage and bright flowers, together with the long blooming season render it a favorite wherever known. Plant in light rich soil and water sparingly until it begins vigorous growth.

Strong flowering bulbs, 25 cents each; \$2.50 per dozen. Seed saved from our Superb Collection, per packet of 20 seeds, 25 cents.

BRODIAEAS

Highly ornamental Californian bulbs, producing erect and slender leafless stalks from one to two feet high upon which are borne clusters of strikingly beautiful lily-like flowers. Few bulbous plants are more reliable bloomers than Brodiaeas or more readily adapt themselves to any soil or situation.

BRODIAEA COCCINEA. (The Floral Firecracker). Flowers 1½ to 2 inches long, of a deep crimson red, the lip being a vivid green. 5 cents each; 50 cents per dozen.

BRODIAEA GRANDIFLORA. Of dwarf habit, producing numerous dark, purple, waxy flowers; very showy. 5 cents each; 50 cents per dozen.

BRODIAEA VOLUBILIS. (Twining Hyacinth). A unique novelty, producing delicate rose pink flowers; when in bud the stems commence to twine and often reach five feet by the time the flowers unfold. 20 cents each; \$2.00 per dozen.

NARCISSUS or DAFFODILS

This is an old favorite especially deserving of notice on account of its easy culture, early flowering and generally effective appearance. Narcissus thrive in any soil and are highly esteemed for their profusion and duration of bloom.

 If ordered by mail please add 15 cents per dozen for postage

CHINESE NARCISSUS

A species of the Polyanthus Narcissus known by the names of "Sacred Lily" "Joss Flower" "Flower of the Gods" "Water Fairy Flower" etc. In China and Japan the natives grow them in fancy bowls filled simply with pebbles and water, and vie with one another in growing the finest specimens for their New Year Festival; successful culture is regarded as an emblem of good luck. They are rapid growers, flower abundantly and are very fragrant.

Extra large imported bulbs, 15c. each; \$1.50 per dozen. Postage, 5c. each

ORNITHOGALUM ARABICUM

Popularly known as the Arabian "Star of Bethlehem" and is one of the most striking flowers we know of. As an Easter decoration it is superb. Its immense spike of pure white flowers is simply grand. The bulb is large and solid, closely resembling that of a hyacinth, and requiring exactly the same culture. Flower spikes of 18 to 24 inches high, strong and graceful, bearing an immense cluster of large, pearly-white flowers, having a jet black center. The individual flowers keep perfect a long time before fading, so that for more than a month this grand spike of bloom is in full glory. It will grow in any position in any window. Plant in a 4-inch pot, or several in a large pot or box. For open ground culture they are also magnificent, and are hardy with slight protection. 10 cts. each; \$1.00 per dozen.

LILIES

Every one loves the Lily—and well they may, for it stands unrivaled amongst hardy plants, for variety of color and beauty of form. Lilies are of easy culture, and as the bulbs we offer are all home grown, firm and fresh from the ground—not dried up and worthless as is often the case with imported bulbs—there is hardly a chance of failure. Plant from four to eight inches deep according to the size of the bulb. They should remain undisturbed for years, as frequent removals injure the roots.

 If ordered by mail please add 15 cents per dozen for postage
TWELVE LILIES OF ANY ONE OF FOLLOWING VARIETIES WILL BE SENT AT PRICE OF TEN

MARIPOSA LILY OF BUTTERFLY TULIP
(*Colochortus*)

COLOCHORTUS

An extremely beautiful class of plants, natives of California, where they are known by the poetical names of "Mariposa Lily" and "Butterfly Tulip." They have erect cup-like flowers of large size and of varied and brilliant colors, borne on stiff slender stalks eight to twenty inches high, with from six to twenty flowers on a stalk. For pot culture they are superb, and in a light rich deep soil are easily cultivated out of doors. They thrive in cold climates when given slight protection during winter.

Splendid mixture of many varieties, 25c. per dozen, \$1.50 per hundred.

LILY OF THE VALLEY

A BUNCH OF
Lily of the Valley

GROWN FROM OUR
SELECTED THREE YEAR OLD PIPS

CALLAS

DWARF CALLA "Little Gem." This variety is a true miniature of the old Calla, and when in flower, a perfect specimen plant but 8 inches high, with full developed foliage. We know of no plant which will be so surely and universally recognized as unique. A well grown plant cannot fail to attract the admiration of every flower-lover. Price, 20 cts. each, \$2.00 per dozen, postpaid.

CALLA LILY. (*Richardia Ethiopica*.) One of the best known plants and of easy management. 10 cts. each; \$1.00 per dozen.

SPOTTED CALLA. (*Richardia Alba Maculata*.) The leaves are deep green, with numerous white spots, which give the plant a fine appearance. The flowers are pure white, with a black centre. 15 cts. each; \$1.50 per dozen.

BLACK CALLA. A recent introduction finding its way rapidly into every collection. The color of the flowers is clear coal black and of the most striking oddity. Large flowering bulbs, 50 cts. each.

These pretty flowers grow in shady places where few other flowers succeed; they bloom freely out-of-doors, and may be had from New Year on, when forced, beginning with a temperature of 45° and increasing very gradually to 65°. If the pots have a little bottom heat during the Winter months, they will do better. Select a half dozen of strong, firm pips, with roots attached, for a six-inch pot, and use rich sandy loam. After flowering, they may be planted in the flower border.

	EACH DOZ.
Flowering Pips, per 100,	\$2.00, \$0.05 \$0.30
Strong Clumps, for planting in the open ground.....	50 5.00

PÆONIES

Well-known, showy, border plants, of many brilliant colors; some of the varieties being deliciously fragrant.

HERBACEOUS VARIETIES—Mixed	
Each, 30 cts.	Per doz., \$3.00
TREE OR JAPANESE—Mixed, each	
\$1.25	Per doz. 12.00

DIELYTRA OR BLEEDING HEART

The flowers are borne on curved stalks, delicate rose-colored and white, purple lips, and presenting when in full bloom a beautiful appearance.

Strong Roots, 30 cts. each; \$3.00 per dozen

TUBEROSES

This delightfully fragrant pure white wax-like flower is too well known to require further description. May be successfully grown either in pots or the garden. If in the latter, select a very sunny location and plant as soon as the soil is warm.

DWARF PEARL—5 cts. each; 50 cts. per doz.
TALL DOUBLE—5 cts. each; 50 cts. per doz.

If ordered by mail add 20 Cts. per dozen for postage

TUBEROUS BEGONIAS

It is next to impossible to describe in words the marvellous beauty of these magnificent flowering plants, which with less labor and attention than other bulbs demand, give wonderfully beautiful results. As pot plants they have no equal, but in the garden they are not always a success unless planted in partial shade and protected from winds and storms. All the varieties are gorgeous and bear flowers of an almost incredible size, and for range and delicacy of color far eclipse any other class of plant. They are most at home in a light, loamy soil and, as already mentioned, require a somewhat shaded location.

ANEMONES and RANUNCULUS

The **Anemone** is unsurpassed among spring flowers for brilliancy of color and profusion and duration of blooming. It is of neat, compact growth, with elegantly lacinated foliage and produces in great abundance flowers of the most vivid hues, which have a splendid effect in beds or masses, while for bouquets or table decoration they are invaluable. Any good soil, moderately well drained will answer; plant two to three inches deep and four to six inches apart.

SCILLA SIBERICA

The Siberian Scilla Squill has flowers of a lovely ultramarine-blue color, borne in graceful spikes; in the house it blooms early like the Roman Hyacinths and forms a beautiful contrast with them. In the open ground they are quite hardy and are specially fine planted in small beds or with Snowdrops. 5 cents each; 30 cents per dozen.

TIGRIDIAS

The Tigridia, or "Mexican Shell Flower," as it is often called, is remarkable for the brilliancy, of its gold and scarlet coloring. Its culture is similar to that of the Gladiolus, and for summer flowering in the garden, the bulbs should be planted out in the spring. It is one of the easiest plants in the world to cultivate and is sure to flower abundantly in any warm situation.

	EACH.	PER DOZ.
CONCHIFLORA, Yellow and orange with crimson spots	\$0.05	\$0.50

OXALIS, mixed, many varieties.....	3	20

WATER HYACINTH

This beautiful plant differs from any other water plant in foliage and produces orchid-like flowers about $2\frac{1}{2}$ inches in diameter; color, delicate lilac, shaded with rose with an orange spot on the upper petal. It can be grown in the open air in summer and in the window in winter. The plants will thrive in any vessel of water placed in the sun. The most beautiful effect is produced by using a glass vessel of some sort; with shells and white sand so arranged in the bottom as to conceal a small amount of soil. The plant is easily grown, so attractive and different from other plants, that it is sure to greatly interest every one. 15 cents each; \$1.50 per dozen.

HYACINTHUS CANDICANS

A very striking and beautiful plant. It is a strong grower and quite hardy; shoots upward a stem three or four feet high, which bears quantities of drooping, ivory-white, bell-shaped flowers of delicate fragrance. 10 cents each; \$1.00 per dozen.

MISCELLANEOUS BULBS AND ROOTS

	EACH	PER DOZ.
Achimenes —When well grown there are few more pleasing plants than these; they require a very light, free soil and a high moist temperature of about seventy-five degrees though they may be grown moderately well in ten or fifteen degrees less heat if kept close and damp. They are well adapted for hanging baskets and all similar situations.	\$0.25	\$2.50
Bessera elegans —(Coral Drops)—Bright coral scarlet, with white cups and dark blue anthers	05	0.50
Caladium esculentum —(Elephant's ears)	20	2.00
„ fancy leaved—Beautifully marked foliage.	35	
Cooperia Drummondii —(Evening Star) white	5	50
“ Oberwetteri —Bright green; recent introduction ...	10	75
“ Pedunculata —Beautiful white fragrant flowers....	5	50
Cyclobothra flava —(Yellow Shell Flower)—Golden yellow eup with fine black dots	10	75
Dahlia —Splendid assortment of double varieties.	15	1.50
Doryanthes excelsa —(Giant Torch Lily of Australia)—A beautiful and distinct plant with long Dracena like foliage, throwing up a lofty spike of bright scarlet flowers like an immense fiery torch, the stem of which is often twelve to fifteen feet high. Extra strong flowering bulbs	1.00	
Eucharis Amazonica —A perfect gem for pot culture; bears large, waxy snow-white star-like blossoms of great beauty; easily grown—large flowering bulbs, 50 cents each; small	25	
Gloxinias —Choice varieties, mixed.	20	2.00
Hoteia Japonica —(Spiræa)—Beautiful feathery white flowers	15	1.00
Iris —This beautiful class of plants exhibits great variety of form and color. All the varieties are perfectly hardy and very suitable for flower borders, the rich and delicate flowers rendering them very attractive; useful as cut flowers as they last a long time in water.		
Iris, English —All colors mixed	5	50
“ German —Of exquisite colors, beautiful and fragrant.	10	75
“ Japanese —(Kämpferi)—Marvellous in form and color.	25	2.50
“ Spanish —Largely grown for cut flowers	5	30
Milla biflora —A Mexican bulb, producing pure white waxy flowers, over two inches in diameter; a splendid plant for cultivation in the dwelling house, being easily forced into bloom.	5	50
Montbretia .—Magnificent decorative plants, producing long branching spikes of Gladioli-like blooms, two to three feet high, in the most delicate and richest shades of yellow, orange and scarlet.	5	50
Tritoma uvaria grandiflora —(Red-Hot-Poker-Plant.) Striking and attractive plant, throwing up stalks three to five feet high, bearing large solid spikes of brilliant orange-scarlet colored flowers of great size and brilliancy.	25	2.50
Zephyranthes —Gems of rare beauty, producing freely either in pots or the open ground, pretty lily-like flowers of the style of Amaryllis. Many varieties mixed	5	40

SWEET PEAS

Sherwood Hall Nursery Co's Sweet Pea Fields at Menlo Park

The marked features of our strain of Improved Large Flowered Sweet Peas is brilliancy and beauty of color, extraordinary size and firm texture of the blooms, and a pleasing fragrance; all of which places them beyond comparison with the ordinary cheap sorts usually sold by seedsmen.

 Extra Early Milan.
 Golden Ball.
 White Egg.
 White Strap Leaf.
 Improved American Rutabaga.

MUSHROOM SPAWN

Culture—Mushrooms may be grown in cellars, under benches of greenhouses or in sheds, wherever a uniform temperature of 50 degrees can be maintained. The beds should be made according to the time the Mushrooms are wanted, and it requires about two months for them to begin bearing. Secure fresh horse-dung, free from straw and litter, and mix in an equal bulk of loam from an old pasture with it. Keep this under cover, taking care to turn it every day to prevent heating, until the pile is large enough to make a bed of the required size. Three or four feet wide, eight inches deep, and any length desired, are the proper proportions for a bed; but these may be varied. Prepare the mixture of loam and manure, making the bed in layers, and pounding down each with the back of the spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees make holes in the bed about a foot apart each way, into which put pieces of the spawn two to three inches in diameter; fill up the holes with the compost, and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Spread a layer of fresh soil over the heap to the depth of two inches, and cover with three or four inches of hay, straw or litter. Examine the bed often to see that it does not get dry. Take special care, however, when water is given, that it be at a temperature of about 100 degrees.

Fuller instructions on the management of this crop will be found in "Mushroom Culture," by W. Robinson, which will be sent free by mail for fifty cents. Our spawn can be thoroughly depended on and being specially manufactured for us is fresh and reliable at all times.

English Spawn. In bricks weighing $1\frac{1}{4}$ lb. each.....\$ 0.20 \$18.00

Weeders. —Excelsior		15			

INSECTICIDES

Hammond's Celebrated Slug Shot.—Guaranteed to destroy Potato Bugs and those on Tomato and Egg Plants, Currant Worms, Cabbage Lice and Worms, Fleas, Beetles and Striped Bugs on Melons, Turnips, Beets, Onions, etc., Canker Worms and Caterpillars on Fruit and Ornamental Trees. Price, 5 and 10 lb. packages, 8 cts per lb.; 25 to 50 lbs. at 6 cts. per lb.

- Grape Dust.**—(Hammond's)—A non-poisonous powder for the remedy of mildew and rot on grapes, gooseberries, etc. Per 5-lb. package, 50 cts; per barrel in bulk, price on application.
- Fir Tree Oil.**—The best insecticide for indoor use on all plants; is also a valuable remedy for animal parasites and insects. Per pint, \$1.00.
- Tobacco Soap.**—Easy of application and fatal to all insect life, whether on plants or animals. Per 8-oz. tin, 25 cts.; per 6-oz. tin, 20 cts.
- Whale Oil Soap.**—Excellent wash for trees and plants to prevent insects from lodging in the bark, and for smearing on the trunks of trees to prevent worms from crawling up. Per 1-lb. tin, 20 cts.; in bulk in quantities of 10 lbs or over, 10 cents per pound.

NURSERY DEPARTMENT

Numerous valuable additions have been made to our list of trees, shrubs and flowers, during the past year, and a careful perusal of the Plant Department of our forthcoming Annual Catalogue will well repay every intending purchaser.

FRUIT TREES

Our stock of fruit trees and small fruits, which is now being listed, embraces all of the standard varieties and novelties grown in California. The growth made during the past summer is excellent, and we feel confident that both orchardists and amateurs receiving trees from us this year will be more than pleased. Every care possible has been taken to have varieties true to name and free from insect pests and diseases, as we fully recognize the great loss often occasioned planters by the want of attention to these details on the part of the nurseryman.

ORNAMENTAL TREES AND SHRUBS

We have grown a very large and complete stock of Shade Trees, Evergreens, and Flowering Shrubs, embracing nearly all of the really desirable varieties suitable for planting on the Coast, and we are prepared to make unusually favorable terms to large planters.

PALMS

It takes a long time to work up a stock of Palms, but after years of patient labor, we now have many thousands of plants, in 25 varieties, all sizes ready for sale, both from pots and open ground, and nearly all hardy in California.

ROSES

Roses from the open ground, both standards and dwarfs, will be ready for shipment December 1st.

We have many fine varieties in pots, which can be delivered at once, if desired, for early planting. Price, 15 cents each; \$1.50 per dozen.

Ever Blooming.—Agrippina, American Beauty, Augustine Guinoiseau, Bridesmaid, Catherine Mermet, Clotilda Soupert, Duchess de Brabant, Duchess of Albany, Graee Darling, Gloire Mundi, Hermosa, La France, Laurette, Madame Caroline Kuster, Madame Pierre Guillot, Madame Cecile Brunner, Madame Hoste, Niphotos, Papa Gontier, Perle des Jardins, Rainbow, Souv. de Wootton, The Bride, The Queen, Meteor, Waban, etc.

Hybrid.—Gen. Jacqueminot, Gloire de Margottin, John Hopper, Madame Plantier, Madame Chas. Wood, Marechal Forey, Oakmont, Princess Adelaide, Paul Neyron, Peerless, Sweet Briar, Magna Charta.

Climbing.—Cherokee—double, Greville, Lamarque, Mary Washington, Marechal Niel, Niphotos (el.), R. M. Henriette, Reine Marie Pier, Wm. Allen Richardson.

CARNATIONS

Our collection of Carnations consists of 100 varieties, the very choicest sorts to be had. Pot Plants will not be ready for delivery before January 1st, but large field grown plants, of which we have a fine stock, can be shipped at once.

Field Grown.....25 cents each, \$2.50 per dozen.

Red.—Annie Webb, Cherry Lips, Edna Craig, Fred Dorner, J. R. Freeman, Portia, Robert Craig.

Pink.—Annie Wiegand, Aurora, Daybreak, Grace Wilder, Mrs. Hill, Springfield, Thos. Cartledge.

Variegated.—American Flag, J. J. Harrison, Nelly Bly.

Yellow.—Blizzard, Golden Gate, Sunrise.

White.—Hinze's White, Lizzie McGowan, Puritan, Silver Spray, White Wings, White Dove.

Violets , 6 varieties.....	.50c per dozen

Geraniums, double and single, scented.

Fuchsias, and everything found in a first class florist's stock.

HOW TO HANDLE PLANTS RECEIVED BY MAIL, &c.

After unpacking, carefully immerse the roots in lukewarm water from one to two hours. This will refresh the plants, when they may be potted or set out in the garden. Spread out the roots naturally in the soil without injuring and press the soil firmly around the plant. Water freely and shade from sun and wind for a few days until they get established. With even so little care as outlined above we know that failure with plants of the quality we supply will be unheard of.

MORRIS POULTRY CURE

A SURE PREVENTIVE AND POSITIVE CURE FOR ALL DISEASES OF POULTRY.

Warranted to be a sure cure for Diptheria, Sore Eyes, Swelledhead, Roup or Cholera, Scaly Legs, or any kindred disease of Chickens, Turkeys, Ducks or Geese, Guinea Fowls, Ostriches, Mocking Birds, Canary Birds, etc., etc., when given according to directions.

The remarkable success of the Morris Poultry Cure has caused a host of bogus nostrums called Poultry Powder, Poultry Tonic, etc., etc., to be placed on the market. Beware of such: insist on having the genuine Morris Poultry Cure and take no other.

Price, 25 cents, 50 cents and \$1.00 per Package

FERTILIZERS

We supply only high grade reliable fertilizers, goods that we know to be as represented; and, quality considered, prices are unusually low.

	Per 100 lbs.	Per ton
Ground Bone	\$2 50	\$35 00
Pure Guano Flour. —Guaranteed to contain 48 to 50 per cent bone phosphate (the same as pure bone-meal) and 1½ per cent ammonia.....	2 25	30 00
Plain Superphosphate —Or dissolved guano (guano treated with sulphuric acid) containing about 16 per cent available phosphoric acid and 1 per cent ammonia... ..	2 50	40 00
Brand A. —Guaranteed to contain 10 to 11 per cent phosphoric acid, 9 to 10 per cent potash, 3 to 4 per cent ammonia; specially adapted for sugar cane.....	3 00	50 00
Brand B. —Guaranteed to contain 14 to 15 per cent phosphoric acid, 2 per cent ammonia, adapted for grain crops and general use.....	2 75	45 00
Brand C. Guaranteed to contain 12 per cent phosphoric acid, 5 to 6 per cent potash, 3 to 4 per cent ammonia, suitable for grass.....	3 00	47 50
Brand D. —Or nitrated superphosphate, a very high grade, intended for irrigated fruit orchards where the soil and irrigating water are found rich in potash. Contains 15 per cent phosphoric acid (nearly all available) and 3½ per cent ammonia. ..	2 75	43 00
Gypsum or Land Plaster	1 75	22 50

LAWN FERTILIZER.—Unless thoroughly decomposed, stable-manure is not desirable, because of the number of weed-seeds contained in it. Our LAWN FERTILIZER possesses the requisite properties to induce a rapid, luxuriant growth, and should be sown broadcast at the rate of 1,500 pounds per acre. A 10-pound package is sufficient for 300 square feet. Price per ton, \$45.00; per 10-lb. package, 75 cents.

A GARDEN FOR A DOLLAR

SPECIAL attention is invited to our Dollar Collections. In most cases, if selected at regular catalogue rates, they would cost one-third more than they are now offered for. Each collection contains only the most desirable varieties in its class, and many of our customers who have not time to make a selection, will realize that this is a convenient mode of ordering. No reduction in the price of these collections can be made, and in view of the large value for the money, we can make no change in the assortments.
